Summary

 I have worked in the distribution industry for the last 15 years, currently looking for an entry-level Software Engineer role.During my boot camp at Grand Circus, as part of a small agile team I implemented JavaScript for a budget tracker application. I also built a movie search form component using Typescript and React to filter displayed movies based on user preferences as part of a movie search application using a third party API. On our final project, an event finder application, I worked as part of an agile team, implementing RESTful endpoints for the backend using Node.js,Express, and MongoDB. I also helped to create components for the frontend using Typescript, React, Node.js, and Firebase. I also learned to implement test-driven development using Jest, and created applications using a sql database with PostgreSQL.

Education

Grand Circus Full Stack JavaScript Bootcamp, Detroit,MI   November 2021-June 2022

Projects include:
Budget Buddy Application(JavaScript, HTML, CSS)
- *Sets Budget for user's desired timeframe*
- *Keeps track of user's expenses and subtracts from budget*
- *Alerts user if adding expense would place user over their budget*

Movie Search Application(JavaScript, HTML, CSS,React,Web API)
- *Displays movie suggestions based on search filters*
- *Displays summary of movie when user clicked on movie poster*
- *Allows user to add/delete movie in favorites list*

Event Finder Application(JavaScript,HTML,CSS,React,REST API, MongoDB,Firebase)
- *Allows user to take a quiz to set preferences for types of events*
- *Uses third party API to list events based on user's preferences*
- *Allows user to add/remove event to favorites collection and leave a review*

Washtenaw Community College Ann Arbor,MI   2006-2008
Completed coursework towards Computer Science degree

Technical Skills

- HTML
- CSS
- JavaScript
- Command Line

- Git/GitHub
- Flexbox
- DOM
- Typescript
- Ajax

- Node.js
- CI/CD
- TDD
- Web API
- ReactJS

Professional Experience

Eby-Brown   2007-Present
Warehouse Picker
- Trained approximately 20 new hires to pick orders in different departments.
- Implemented a performance based system by assisting in other departments to help increase production rate.

- Assisted to set production goals for members in my department.
- Helped to implement a new voice-based picking system and sap to increase production and lower error rates.
